BASF Aktiengesellschaft signs an agreement which allows a worldwide installation of ACD/IUPAC Name within BASF

GERMANY, FEBRUARY 14, 2000.— ADVANCED CHEMISTRY DEVELOPMENT IS PLEASED TO ANNOUNCE AN AGREEMENT WITH BASF AKTIENGESELLSCHAFT WHICH ALLOWS A WORLDWIDE INSTALLATION OF ACD/IUPAC NAME WITHIN BASF.

In recent years a number of computer software programs promising systematic naming capabilities have been delivered to the marketplace. Foremost among these are Advanced Chemistry Development's IUPAC Name and Index Name software packages, which offer systematic naming according to either IUPAC rules or CAS Index rules. Our professional naming products place an emphasis on naming important and complex structures correctly. To be in accordance with the IUPAC recommendations, we even participate directly in the work of the IUPAC Commission on Nomenclature of Organic Chemistry.
