ACD/Labs Unveils Latest Advances in Phosphorus NMR Prediction and Systematic Naming, and Releases First Textbook

Birmingham, UK, July 4, 2004 -

ACD/Labs has been at the forefront of Phosphorus NMR prediction for almost half a decade and has delivered to the marketplace the largest phosphorus NMR content database available. At the ICPC meeting we exposed recent advances in our PNMN software and ACD/Name software applied to phosphorus-based compounds. At the ICPC meeting, we also released the book "PRACTICAL INTERPRETATION OF P-31 NMR SPECTRA AND COMPUTER ASSISTED STRUCTURE VERIFICATION" co-authored by Professor Louis Quin and ACD/Labs' Antony Williams. For detailed information about the book, please visit http://www.acdlabs.com/publish/book_pnmr/.
