

Get caught up on what's happening in the world of analytical chemistry and scientific software. Check out these upcoming events and resources, including presentations from top pharmaceutical companies like Pfizer, Merck, and Sanofi.

What's that Peak? Structure Elucidation & Verification Virtual Symposium

Do you wonder if there are better ways to turn your analytical data into chemical structures that you feel confident in? Get insights from experts from Pfizer, Sanofi, Novartis, AstraZeneca, Bristol Meyers Squibb, and more!

Attend the virtual symposium on **October 25th–26th**. Topics will include:

- Workflows in support of understanding drug impurities and degradants
- Structure elucidation workflows with case studies
- Use of automation to support structure verification

Webinar: How Pfizer is Using Luminata to Support Pharmaceutical Development

Pharmaceutical development requires a massive volume of chemical, analytical, and process data. Handling this data can be time-consuming, error-prone, and frustrating.

Join Dr. Hannah Davies (Principal Scientist, Pfizer) on **October 13th** as she explains how Luminata has helped simplify data management and accelerate pharmaceutical development at Pfizer.

Video on Demand: Power of Chromatographic Modeling for Small and Large Molecules

The growing use of biomolecules has increased demands on analytical scientists. Method development has become more complex, and scientists must quickly adapt.

Learn how Gioacchino Luca Losacco and his colleagues at Merck, achieved effective method development workflows by integrating computer-assisted modeling into automated screening platforms.

ACD/Labs Joins the Tetra Partner Network

ACD/Labs is partnering with TetraScience, the Scientific Data Cloud company, to help pharmaceutical companies increase scientific data effectiveness.

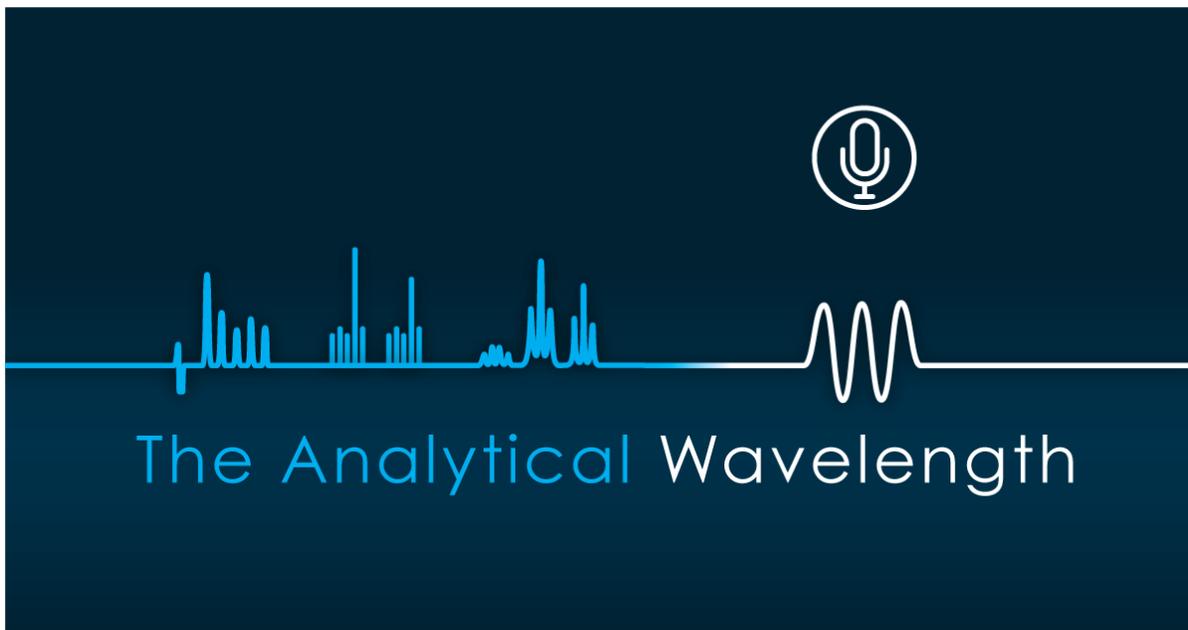

We invited Simon Meffan-Main, Ph.D., and Alan Millar, Ph.D., Vice Presidents, Tetra Partner Network, TetraScience, to share some insights on cloud computing in the pharmaceutical industry.

Upcoming Conferences and Trade Shows

Events are back, and we couldn't be more excited! Are you going to be attending any of the following events? Come find us and say "Hi!"

- [Jinlin International Analytical Chemistry Conference \(JLA\)](#): Nanjing, China, September 27-28
- [Janssen Small Molecule Discovery](#): Toledo, Spain, September 27-29
- [Lab of the Future](#): Amsterdam, Netherlands, October 4-5
- [PANIC](#): San Diego, USA, October 16-19
- [Bio-IT World](#): Berlin, German, October 18-19

Podcast: The Analytical Wavelength— Season 3

Season 3 of the Analytical Wavelength has just started! Our team of experts are working every day with the world's top scientists. Join us for conversations to get a *peak* at what is happening in the world of chemical and analytical data.
