

Spring is here, which means summer is just around the corner. What has ACD/Labs been up to? Here are some highlights of recent news and upcoming events.

Webinar: The Secrets to Getting More Out of Your Chemical Drawing Software

June 16th (10:00 EST | 14:00 GMT | 15:00 CET)

Molecular drawing tools are essential for everyone in chemistry. Are you maximizing the value you are getting from your chemical drawing software?

Join Allyson Yee (Customer Success Coordinator, ACD/Labs) on **June 16 (10 am EST | 2 pm GMT)** as she explains how you can do more while spending less.

Just Announced: Browser-Based LC/UV/MS and GC/MS Data Processing is Coming This Fall

Spectrus JS is the industry's first vendor-neutral, multi-technique analytical data processing application that runs in your browser. With this recently announced update, users will be able to:

- Process xC/UV/MS and NMR data
- Predict 1D and 2D NMR spectra
- Interpret and report data with chemical context

All from the web browser of your choice.

Videos on Demand: Succeed in Your Analytical Data Management Strategy

Digitalization of analytical data is challenging. Analytical data typically lives in CDSs, ELNs, LIMS, and individual vendor databases—either siloed or abstracted into text and images.

You work with it on computers, but is it digitalized?

Is your analytical data available to computer software without human manipulation?

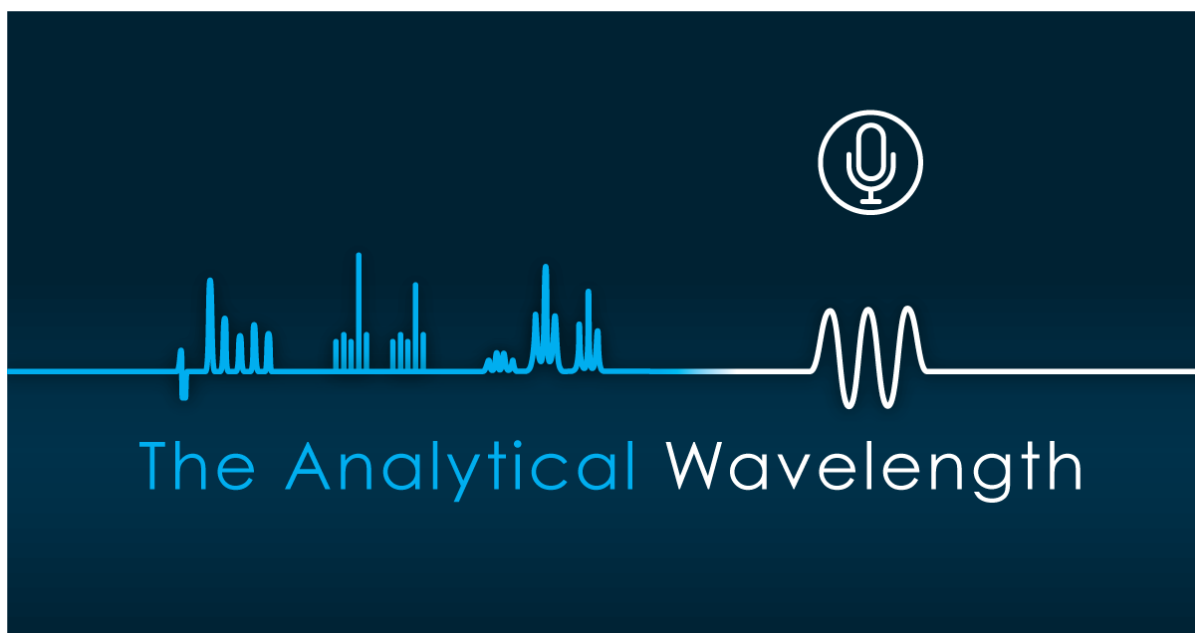

Watch our 2-part webinar series to learn how to develop an analytical data strategy.

Upcoming Conferences and Trade Shows

Events are back, and we couldn't be more excited! Are you going to be attending any of the following events? Come find us and say "Hi!"

- ASMS: Minneapolis, USA, June 5-9 [Details](#)
- Nitrosamines Mini-Event: Online, June 14 [Details](#)
- HPLC: San Diego, USA, June 18-23 [Details](#)
- Danish NMR: Aarhus, Denmark, June 20-21 [Details](#)
- Analytica: Messe München, German, June 21-24 [Details](#)
- ACD/Labs' Paris Symposium: Paris, France, June 21 [Details](#)

Podcast: The Analytical Wavelength— Season 2

Season 2 of the Analytical Wavelength is complete! This season was all about chemical predictions: why they matter, how they work, and how they are going to influence the future of science.

All five episodes are now live.

ACD/Labs Website Update

We are excited to announce that our website update is live! Everything has been redesigned, reorganized, and rewritten to help scientists like you to find the information you need.
