the
Analytical Scientist

>92%
of scientists

- use multiple techniques
- collect data on numerous instruments
- process data using diverse software

68% say data is hard to access and share
9/10 need analytical data on a daily basis to make decisions

~50%

feel that cloud-based data management is important

[Watch on Demand] How to Overcome the Challenges of Analytical Data Management

While the world of R&D is moving towards digitalization, analytical data management continues to be challenging. That's why [we survey analytical chemists](#) every few years to see how they are managing their data.

Watch our panel of experts on as they discuss the results of our 2022 survey, and explore the latest trends in scientific data.

[Announcement] ACD/Labs and ELSIE Consortium are Developing a Safety & Materials Database

We're making extractables and leachables data more accessible than ever. Our partnership with **Extractables & Leachables Safety Information Exchange (ELSIE)** will create a searchable database of pre-competitive E&L data – improving collaboration and data sharing in this area of research.

[Case Study] How Computer-Assisted Structure Identification Helped Increase Efficiency

Analytical data management is at the core of helping scientists leverage legacy knowledge to gain efficiencies.

See how data management has improved structure identification on a day-to-day basis.

Upcoming Conferences and Trade Shows

Conference season is here, so we are hitting the road! Come say "Hi!" if you are planning to attend any of the following events:

- [Forum LABO](#): Paris, France, March 28-30
- [ENC](#): Pacific Grove, CA, USA, April 16-21

- [ACD/Labs UK Symposium](#): Cambridge, UK, April 26
- [ACD/Labs Frankfurt Symposium](#): Frankfurt, Germany, May 10
- [Bio-IT World](#): Boston, MA, USA, May 16-18

[See all our upcoming events!](#)

Podcast: The Analytical Wavelength

Season 3 of the Analytical Wavelength is underway! Join us for conversations with experts from ACD/Labs to get a *peak* at what is happening in the world of chemical and analytical data.

[Listen & Learn](#)

Thanks for reading!
