Get caught up on what's happening in the world of analytical chemistry and scientific software! Register for our upcoming virtual symposium, or check out our latest resources.

[Webinar Series] Lessons in Prediction

The push for greater productivity and accelerated R&D has led to wider adoption of predictive tools in the lab.

Join our short webinar series where experts in the field discuss how to apply ionization and NMR spectral prediction to support decision-making in a modern research environment.

[eBook] Into the Unknown: The Analysis of E&Ls in Medical Devices

There are certain challenges that almost everyone analyzing extractables and leachables (E&Ls) in medical devices encounters.

Read the eBook to learn how to accelerate your E&L analysis, including real-world examples of how Medtronic is using MS Structure ID Suite to accelerate their E&L workflows.

[Case Study] How AstraZeneca is Overcoming Obstacles to Analytical Data Access

Scientists and IT at AstraZeneca combined their expertise and knowledge to centralize analytical data management to make re-usable data available throughout discovery, development, and for machine learning applications.

[Read the case study](#) about how AstraZeneca's automated system—integrated with analytical instruments, ELN, and archive—is delivering real benefits.

[Watch on Demand] Accepting What Works: ISA-88 for Process Chemistry

Digitally transforming process chemistry in pharmaceutical development has been a challenge. See how **Bayer's** data architecture supports its digital chemistry initiatives in process development with the help of Luminata.

Topics covered include:

- Bringing together data from many systems, including ELNs and laboratory reactors
- Luminata's visualization tools for process chemistry
- How Bayer is connecting pharmaceutical development data to machine learning tools

Meet Us at Upcoming Conferences!

Conference season is here, so we are hitting the road! Come say "Hi!" if you are planning to attend any of the following events:

- [Pittcon](#) February 24-28, San Diego
- [Lab of the Future](#) - March 11-12, Boston

- [PPNMR](#) – March 12-13, Frankfurt
- [ENC](#) – April 7-11, Pacific Grove
- [Analytica](#) - April 9-12, Munich

[See all our upcoming events!](#)

Thanks for reading, and be sure to follow us on social media ([LinkedIn](#) | [Twitter/X](#) | [Facebook](#)) so you can keep up to date on our latest news and resources!
